**DC 140 Handrail & Wall Protection System**

DC 140 Handrail Wall Protection System is decorative wall protection band with 140 mm width and 75 mm depth . Continuously curved wall protection band is installed to the wall by using continuous aluminium retainer. It absorbs impacts due to lower rubber wick and offers modern solutions by decorative end caps and accessories. Its superstructure and wide guard area make it an ideal system for hospitals, shopping centres, public buildings, schools and areas exposed to heavy human-traffic. Vinyl cover is provided with the same colour of the decorative finish end parts. The profile length is 4 meters and produced in 32 different colours.
